

# R.B. STEEL & CO.

## 50 years of quality service

Their first removal to Rosyth consisted of a sailors kit bag, his motorcycle and a box of tools. The cost was the princely sum of 9 pounds 10 shillings and 6 pence. James Steel son of the companies founder Robert Steel and company owner since 2003 says " A removal to Rosyth today would cost slightly more than that but our first customer was delighted and we aim to give every customer the same standard of service every time." Moving on, the companies' first international removal was in the early 70's and saw an R B Steel truck heading for the first time into the sunny climes of Palma, Mallorca, Spain. That move went smoothly as have many others since and many satisfied customers will testify to that. R B Steel & Co have moved people right around the globe and sometimes they've even moved them back again, when homesickness has struck. International moves now account for roughly 50% of the

**Since 1959 R B Steel & Co, the Removal and Storage Company, have been providing an essential service to our community.**

companies' annual moves. The removals side of the business grew in the 80's and 90's with the inclusion of Royal Navy relocation contracts. More trucks on the road meant an increased need for storage and a new warehousing facility was purchased to cater for demand. More recently 2003 saw the conversion of the Helensburgh site to provide 80 Self Storage Rooms & serviced offices. This offered a "self service" storage option in Central Helensburgh ideal for those wishing to declutter, for temporary storage or even as a stock room for local business. Best of all Self Storage is VAT free.

As an expansion to the storage and warehousing service provided, 2007 saw the purchase of a 5-acre site in Old Kilpatrick. The former bus depot received

a face lift and was re-invented as Gavinburn Business Park. This site now takes R B Steel & Co. storage & warehousing services firmly into the 21st century. The site offers a myriad of storage and warehousing options. Ranging from a single pallets storage, to a whole warehouse of 20,000 square feet, available "to let", not to mention a further 300 self storage units. Gavinburn Business Park is so accommodating that its tenants now include, but to name a few, an Indoor football arena, a generator repair business and a ladies only Gym. Small businesses are also catered

for by means of secure "drive-up" 10 foot and 20 foot storage containers.

So from 1959 to 2009 a family business that's grown on reliability, service and hard work has "moved" onwards and upwards. Whether its storage and warehousing or Local, National or International removals, look no further than this Local firm for your next move or for your personal or business storage needs
